ABOUT US

We established as a part of manufacturing and machining service industry in 2006.

As the nation grew, our establishments along with our facilities, skills, equipment, machining capabilities, quality control and many more also grew. Mr. Kaushik Patel, a brilliant mindset in growing business and accounting along with Mr. Alpesh Patel, a genius mind full of machinery and mechanical mindset started this industry in Ahmedabad with just one machine. We are an ISO 9001:2015 certified company, aiming for better machining capabilities and quality control in this mechanical industry.

Leveraging cutting edge design technologies such as Mastercam and, we ensure high-quality product development. Our high-end facility is well equipped with machine systems for machining like Advanced CNCs like VMC, HMC, Turning Centre and H. Boring. We ensure our clients promises by high end inspection of quality and geometry on CMM.

MISSION:

Our mission is to satisfy our clients with close tolerances, quality control and best inspection of geometry. We can achieve this only through strong relationships with our clients and employees. We focus on sustainable and safe environment of working for better results in what we provide. In every part we put our efforts should not only meet our clients' expectations but also should exceed in their fields which leads to a great future of our nation. We Are focus is to satisfy our clients which leads to a long-term partnership and a strong bond. We are dedicated to innovations, our team along with our owners are always ready to learn and apply new technologies for satisfying our clients need. Our mission is to be the best machining solution provider for any field of industry which leads to a safe and sustainable INDIA.

VISION:

Our vision is to establish ourselves as the best machining solution provider with better quality and geometry inspection. We are pushed and supported with sustainable and safety ensured technologies. Our vision is to set new benchmarks which leads to making strong trusts all over the world.

MISSION

VISION

VALUES

INDUSTRIAL FIELDS

AVADH, having ample infrastructure to Design, Machine and Delivery with advance level Quality Check aspects...With Large Size Gantry Moving CNC Machining Centers and Advanced Quality Control Equipment's.

AVADH, Optimum feasibilities to machining High Resilient METAL applications of "Titanium, Inconel, Armor Steel, Duplex Steel, Aluminum, Copper, Bronze, and Nickle" and Ultimate Importunately "COMPOSITES" like Carbon Fiber (CFRP), Glass Fiber (GFRP)..., Ceramic Tile...

INDUSTRIAL - HIGH PRECISION - CLOSE TOLERANCES

Thermal, hydro, defense, aerospace, aeronautical, pumps, valves, gears, bearings, marine, railway, wind mills, steel, die & mold, automotive, machineries.

SERVICE LIST

✓ PRECISION

High precision components like turbine runner blades, valve bodies, injection molding machine's mold, filling and packaging machineries, die & punch of block making machine, defense aircraft parts, pump bodies, excessive tapping and drilling, etc. through highly advanced CNC Machining technology and Accurate Inspection facility.

✓ INSPECTION

Accurate Inspection facility which can inside geometry dimensions of high precision and close tolerance machining items through advanced CMM machine technology.

✓ QUALITY CHECK

Every employee at AVADH is taught about quality check from the very first day. Every component goes through quality check-before-in between machining-after. Every quality check consists of checking porosity, strength and hardness. After several quality checks only, it gets finalized.

✓ CNC MACHINING

AVADH, always believed in learning and utilizing new technologies for best results in every component manufactured. Machining capabilities are supported by Double Column VMCs, Small and big table size HMCs, turning centers, Boring machines and the list goes as new technologies comes in the market.

✓ DELIVERY

After several quality checks, inspection results our employees do the packaging in such a way that the component does not get any harm while in travel by-flight, seaways, road & rail.

OUR PROCESS

5 Steps and a long-term strong partnership is made with trust and support.

1. REQUEST

We work closely with our clients to understand their needs.

2. PROGRAMMING

Our Engineers study properly to the specifications and develop custom Programing.

3. MACHINING

We use high tech CNC machines to work on components with strong tools and instruments.

4. INSPECTION

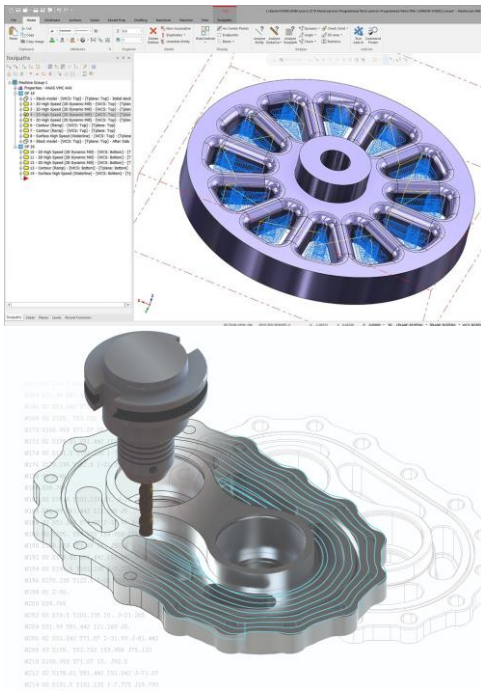

We conduct rigorous quality checks and inspections with proper inspection instruments and do run inspection on CMM machine.

5. DELIVERY

We deliver your finished products on time and within budget.

DESIGN

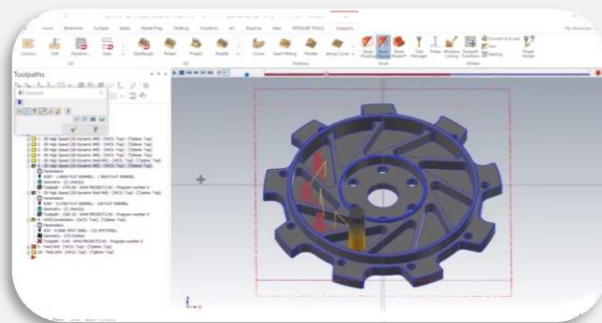

Our company thrives on design excellence, where innovation meets precision. With a passionate team leveraging advanced CAD/CAM technologies, we create intelligent, production-ready solutions tailored to demanding engineering needs. From concept development to detailed optimization, our designers consistently deliver high-quality results that enhance functionality, efficiency, and overall product performance—setting a benchmark in modern manufacturing.

Working with expertise manpower and world's leading CAM services, Avadh facilitate with MASTERCAM software which acquire both simple and complex geometries can be programmed efficiently.

Work pieces can be completely machined in a single setup thanks to the broad range of machining strategies.

The advantages: continuous and more efficient processes, reduced processing times and higher reliability. In addition, this can offer several options for automated programming, reducing machine cycle times and optimizing processes. Examples of this include sophisticated feature and macro technology, automated functions such as mirroring and transforming, functions that minimize auxiliary processing times such as job linking or production mode, and fully automated collision checking and avoidance.

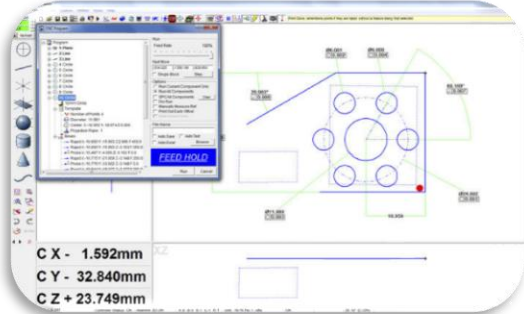

We utilize Mastercam software for advanced CAD/CAM programming, enabling precise and efficient CNC machining of complex components. Its powerful simulation and optimization tools help reduce errors, improve cycle times, and ensure premium quality output. Supported by our highly skilled and innovative design team, we consistently deliver optimized toolpaths and superior manufacturing results. Their expertise and attention to detail ensure excellence at every stage of production.

MACHINING

- With over 20 years of industry experience, we specialize in precision machining solutions for diverse industrial applications.
- Our state-of-the-art facility is equipped with advanced CNC machines capable of producing complex components with tight tolerances and exceptional surface finish.
- We work with a wide range of materials and ensure consistent quality from prototype development to full-scale production.
- Our team of knowledgeable engineers and trained machine operators follow strict quality control standards throughout every stage of manufacturing.
- Continuous learning, technology upgrades, and process improvements keep us aligned with evolving industry demands.
- We emphasize efficiency, on-time delivery, and transparent communication to ensure complete customer satisfaction.
- By combining modern machining technology with expert craftsmanship, we deliver reliable, cost-effective, and innovative engineering solutions.
- Stringent inspection processes ensure accuracy, durability, and compliance with customer specifications.
- Our flexible machining setup allows quick turnaround and adaptation to dynamic project requirements.

INSPECTION

- Our company maintains a dedicated, climate-controlled inspection department to ensure consistent and reliable measurement results.
- We utilize advanced CMM (Coordinate Measuring Machine) systems for high-precision dimensional inspection of complex components.
- Equipped with industry-trusted Aberlink inspection software, we ensure accurate measurement, detailed analysis, and comprehensive reporting.
- A wide range of calibrated gauges, micrometers, height gauges, bore gauges, and special measuring tools are available for part verification.
- Inspection begins before machining with raw material checks, verifying dimensions, hardness, chemical composition, and surface condition.
- During machining, components are inspected at multiple stages to monitor tolerances and avoid dimensional deviations.
- After machining, final inspection ensures circularity, flatness, surface finish, and overall accuracy meet customer specifications.
- Precision measurement on CMM ensures critical features are verified with repeatable and traceable results.
- All measuring instruments undergo periodic calibration to maintain the highest level of accuracy.
- Detailed inspection reports are generated using Aberlink software, complete with dimensional charts, deviation results, and tolerance compliance.
- Skilled and experienced inspectors evaluate results, identifying any non-conformities and recommending corrective actions.
- Statistical process control (SPC) methods are applied to track machining consistency and minimize variation.

1. 3 Axis Gantry Moving Vertical Machining center

- Table size : 3000 x 2000 mm.
- X-Axis Travel : 3200mm.
- Y-Axis travel : 2760mm.
- Z-Axis travel : 800 (1000) mm.
- Table Capacity : 10 Ton
- Make : JYOTI (INDIA)

2. 3 Axis Horizontal Machining Center

- Table Size : 400 x 400 mm (DOUBLE PALATTE)
- X-Axis Travel : 520 mm
- Y-Axis Travel : 520 mm
- Z-Axis Travel : 520 mm
- Table Capacity : 400 kgs
- Make : HAAS (USA)

3. 3 Axis Horizontal Machining Centre

- Table size : 630 x 630 mm (DOUBLE PALATTE)
- X-Axis Travel : 1020 mm
- Y-Axis Travel : 850 mm
- Z-Axis Travel : 880 mm
- Table Capacity : 1.25 Ton
- Make : OKK (JAPAN)

4. 3 Axis Horizontal Machining Centre

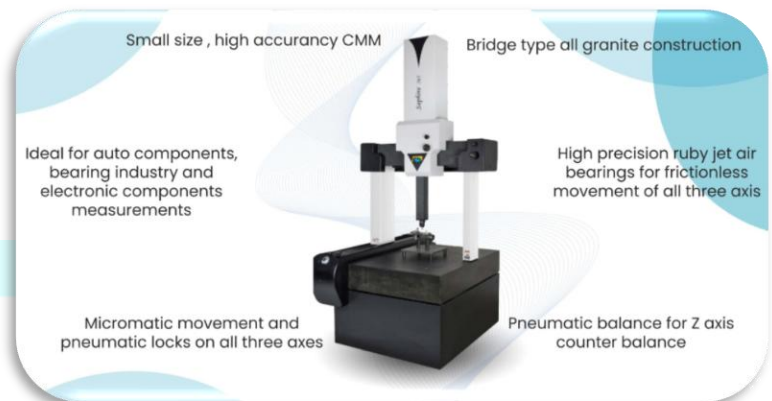

- Table Size : 300 x 300 mm
- X-Axis Travel : 450 mm
- Y-Axis Travel : 400 mm
- Z-Axis Travel : 400 mm
- Table Capacity : 200 kgs
- Make : MAATSURA (JAPAN)

5. Co-ordinate measuring machine

- X-Axis Range : 500 mm
- Y-Axis Range : 600 mm
- Z-Axis Range : 400 mm
- Accuracy : $+ 3.5 + L / 200 \mu\text{m}$
- Table Capacity : 350 kgs
- Make : ELECTRONICA
(INDIA)

AVADH HAS ALWAYS BELIEVED IN ACCEPTING AND LEARNING NEW TECHNOLOGY MACHINARIES AT THEIR FACILITY.

OTHER THEN ABOVE-MENTIONED HIGH-TECH MACHINES, WE ALSO HAVE NUMEROUS MACHINES LIKE:

- ✓ **TURNING CENTRES**
- ✓ **HORIZONTAL BORING**
- ✓ **VERTICAL TURNING LATHE**
- ✓ **DRILLING MACHINES**
- ✓ **AUTOMATIC TAPPING MACHINES**

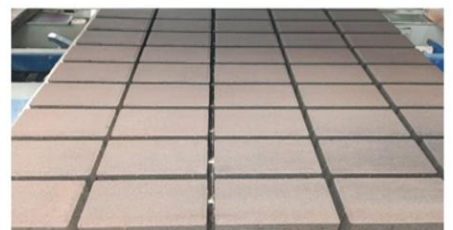

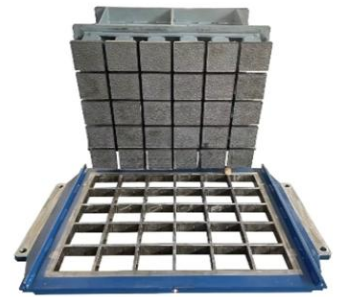

HOUSE OF MOLD

Avadh has been the fastest growing mold making company for fully-automatic and semi-automatic paver, concrete, flyash and retaining wall block making machine. We have successfully developed different design for mold and supplied to top block manufacturing companies in India. From basic parts to complex concrete molds solutions, our state of the art CNC equipment capabilities provide complete mold solutions for your production needs. Our machine shop has some impressive capabilities.

Using hard material in making of punch and mold, our customers find ease in using and setting up on the machine with neat and best block results.

AVADH's expertise to provide most efficient and sustainable solutions in the field of precision machining with the advanced technique certified for the manufacturing of aerospace Industries....

Providing Optimal Solutions to Machining of Large Sized Precision Components for Aerospace Industries....

AVADH's expertise to provide most efficient and sustainable solutions in the field of precision machining with the advanced technique certified for the manufacturing of DEFENCE Industries....

Avadh stands as a dynamic and quality-driven engineering organization, committed to delivering precision machining solutions across diverse industrial sectors. With a strong foundation built over years of continuous growth, we have evolved into a trusted partner known for technical expertise, reliability, and innovation.

Our state-of-the-art facility, advanced machining capabilities, and skilled workforce enable us to handle complex requirements with accuracy and consistency. Serving industries ranging from industrial machinery and automotive to aerospace and defense, we ensure every product meets the highest standards of performance and durability.

At Avadh, customer satisfaction is at the core of every process we follow. We believe in transparent communication, timely delivery, and proactive support to ensure our clients receive not only a finished product, but a complete solution. Through our dedicated approach, we aim to build strong, long-term relationships based on trust, commitment, and mutual growth. Many of our valued customers continue to choose Avadh because they find reliability, responsiveness, and a partnership mindset in every interaction.

BUILT WITH TRUST AND EXCELLENCE

ACCURACY. PRECISION. INNOVATION.
